

MASTEC

Mastec Plastema invest in the future

We have now expanded our machine park with a larger injection machine from Borché. The clamping force is 1200 ton which will give us the possibility to produce parts up to 8 kg. This gives us a fantastic opportunity to support our customers for an even wider range of products.

There is an increased demand for capacity to produce larger products and we at Mastec Plastema are proud to meet the challenge. In total, Mastec Plastema now has 20 injection moulding machines from 25 ton up to 1200 ton.

Do not hesitate to contact us.

The Mastec Group is a privately owned company with headquarter in Huskvarna, Sweden. The turnover is around 75 million EUR (2019) and the group consist of 5 units in Sweden and 1 in Poland. Our core businesses are Assembly, Machining, Welding, Sheet Metal Processing, Plastic Manufacturing and Surface Treatment.

LEAN & 5S

Through our continuous work with LEAN and 5S, we have an efficient and well-organized production, offering our customers short lead times, excellent delivery precision and quality.
